Bi-Lingual Fluent in Spanish and English. Ex-entrepreneur transitioning into a Full stack javascript developer after completing a Full Stack Web Development MERN (MongoDB, Express, React, Node) certification from The University of Texas at Austin. Diverse experience in product design, marketing, and innovation to apply to application development and platforms to meet client objectives. Talented at user requirements gathering, systems analysis, and comprehensive solutions. Highly creative and detail-oriented with a neat and organized visual design style to accomplish clarity. Consistently problem-solver passionate about developing applications with a focus on interactive functionality. Well-versed in backend integrations and database administrators. I have a natural passion for interconnection with highly diverse and inclusive teams.

EXPERIENCE

Entrepreneur Julissa Hash Sole-Proprietor

2015–2023

Self-employed

Austin, TX

I have created and managed a family business, including customer acquisition, service delivery, billing, and collections. We provide household management services on a recurring weekly basis—primarily high-end professional clientele who travel frequently.

Key Accomplishments:

- I grew the business to 20% annual growth via high-quality service delivery and referral marketing.
- Responsible for client communications, service delivery, and relationship management.
- I coordinated all operational logistics, including staffing, scheduling, and client feedback.
- Developed all processes and managed all P&L responsibilities for this business.
- I have implemented new services recognizing and innovating upon everyday client needs.

EDUCATION

Certificate, Full Stack Web Development (2021)

The University of Texas at Austin, Austin, TX

Post-Secondary Diploma, Administrative Management, and Marketing

British Academy, Lima Peru
